EXHIBITION NOTE

The World Through Little Eyes invites us to step into a space where imagination is limitless and every color, line, and shape tells a story. This exhibition celebrates young artists whose creations remind us of the honesty, curiosity, and wonder that come naturally to children.

Children create without fear, colors are bold, shapes are unexpected, and the ordinary becomes extraordinary. Each piece, from playful doodles to detailed compositions, reflects creativity at its purest: joyful, exploratory, and fearless.

These works are glimpses of childhood itself, capturing moments of play, discovery, and emotion. Together, they form a vibrant tapestry that invites us to remember our own unfiltered creativity and to see the world anew through the fresh eyes of a child.
